

„Coastman“ – The project

The project „Coastal Zone Management in the Baltic Sea Region“ – „Coastman“ – investigates interactions between environment conservation, conflict management and sustainable development in six coastal zones of the Baltic Sea. Such interactions between all active interests have been neglected in the past. The project partners Sweden, Germany, Finland, Estonia, Lithuania, Latvia and Russia will analyse environmental problems and assess the risks of the Baltic Sea coast with reference to exploitation of coastal zones. They will suggest measures to improve the situation. They want to establish a better coastal zone management via exchange in seminars, educational programmes, inspections and in dialogue with regional decision-makers. The „Coastman“ partners stand together for a sustainable coastal zone management for the Baltic Sea region.

Introduction

A sustainable and integrated coastal zone management is strongly dependent on national and international policies. In order to allow a discussion on the theoretical background, the national implementation and the influence of policy-making in integrated coastal zone management, TuTech Innovation is hosting this seminar as part of the Interreg IIIB project Coastman.

Aims

- To discuss the role of policies in coastal zone management in the Baltic Sea
- To foster the exchange of information about the latest trends and perspectives of ICZM
- To encourage a cross-sectoral interaction between ministries, universities and institutes across the Baltic Sea region
- To promote efforts in respect of coastal zone management and of the initiatives of the Coastman project.

Delegates

The seminar will be of special interest to ministries, scientists and organisations active in the field of ICZM in Europe. It will provide a useful opportunity to discuss aspects of policies related to coastal zone management and conflict management. Due to the need for in-depth discussions, participation will be limited to a maximum of 50 people.

Venue

The seminar will be held at: TuTech Innovation GmbH, Harburger Schloßstrasse 6-12, 21079 Hamburg, Germany

AGENDA

<i>09.00 - 09.15</i>	<i>Arrival and coffee</i>
09.15 - 9.30	Introduction (Prof. Walter Leal, Coastman Hamburg, TuTech Innovation)
